PROJECTS

- Aurea — E-commerce platform with blockchain-based authenticity certificates. Built as final degree project (TFG) using React, FastAPI, Python and PostgreSQL.
- Marlisa Fijaciones S.L. — Bilingual (ES/EN) corporate website for an industrial fixings company. Built with React, FastAPI, Tailwind CSS, i18n and PDF generation.
- EmirateAutoGroup — Luxury car import platform (Dubai→Spain) with JWT authentication, car catalog and import cost calculator. Built with Next.js, FastAPI and MongoDB.
- Portal 365 — Multi-tenant enterprise web portal integrated with Microsoft Dynamics 365 Business Central. Built with ASP.NET Core MVC and C#.

TECHNICAL KNOWLEDGE

- Frontend: React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3
- Backend: FastAPI (Python), ASP.NET Core (C#), REST APIs, SOAP/OData
- Databases: PostgreSQL, MongoDB, MySQL, SQL Server
- Other: Git, Docker, JWT, i18n, Blockchain (basic)

EXPERIENCE

ExtraSoftware – Professional Internship (26/03/2025 – 13/06/2025)

I am currently completing a professional internship at ExtraSoftware, where I participate in the development and maintenance of applications using technologies such as **SQL, C#, ASP.NET (MVC), Kotlin, HTML, CSS, Bootstrap, JavaScript, and jQuery**.

AllCloud – Junior Software Developer (20/10/2025 – Present)

Working on Portal 365, a multi-tenant B2B/B2E web portal built with ASP.NET Core MVC, integrated with Microsoft Dynamics 365 Business Central via SOAP/OData APIs. The platform manages employee and provider workflows including login, dynamic menus, tables, time tracking and notifications. Also developing C# connectors for system integration, REST API consumption between platforms, and collaborating on bug fixing, code optimization and application maintenance. Also i did a migration of applications from Laravel to PHP
